This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### WARNING

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### Important Safety Instructions

#### WARNING

When using this product, basic precautions should always be followed, including the following:  
Read these instructions carefully.

- All cautions and warnings should be followed.
- The equipment should only be used at maximum 35°C (95°F) ambient temperature.
- Opening the equipment could result in electrical shock and should only be done by qualified service personnel.
- Protect equipment from humidity.
- Do not insert foreign objects or liquids into the openings, this could cause a fire or electrical shock.
- Do not use chemical detergents to clean your device, use a soft dry cloth.
- To avoid damage from electrical peaks unplug the device when it is not in use.

If one of the following situations arise, equipment has to be checked by qualified service personnel:

- Liquid has penetrated into the equipment.
- Equipment has been exposed to humidity.
- Equipment has been dropped and/or is damaged.
- Equipment has obvious sign of breakage.
- Equipment does not work well or you cannot get it working according to user's manual.

Do not expose the equipment to water or place objects filled with water on top of it.
