

## User manual

1. Clean the screen with a cleaning cloth, and if there is still dust on the screen, use a dust-absorber to clear the dust on the screen for the cleaning effect.

2. Tear off the plastic film on the surface of the product, aim the glass film at each hole/edge of the screen, and slowly put it down.

3. Press the middle position with your fingers and let it stick naturally.

4. Squeeze out the excess bubbles with a cleaning cloth.
