DXRACER - SINCE 2006 -
MASTER

Multiple color options

Product Description

DXRACER has focused on the design and R & D of Gaming chairs for many years, and has always led the renewal and upgrading of the concept of Gaming chairs. DXRACER continue the traditional "Drifting" design style. Master Series strives to create a business style seat, which can be comparable to the exquisite leather feel of a sofa, and can be also comparable to the exquisite tailoring of a suit. MASTER series show elegance and luxury of each chairs. Master series are equipped with special leather for racing chair, special waist adjustment components for racing chair, new style of track adjustable headrest, etc. as standard, which aims to present the cutting-edge industrial design and manufacturing technology of Gaming chairs to users.

Master 2022 has been revised and upgraded according to the market feedback of master 2021, which has been hot selling for one year. It adopts super fiber perforated leather, which has better breathable and more fashionable appearance. It is a gaming chair comparable as comfort as sofa. Personalization is the subversive experience brought by the master chair. The modular structure allows users to change cushions of different materials according to their own needs and experience the revolutionary full breathable cushion Gaming-chair seat.

In addition, the personalized combination design brings unlimited expansion space. Not only the notebook support, cup holder, footrest launched by DXRACER but the upcoming driving simulation device and small table, consumers can even design and install accessories by themselves through the standard "interface" of "DXRACER MASTER".

Product Introduction

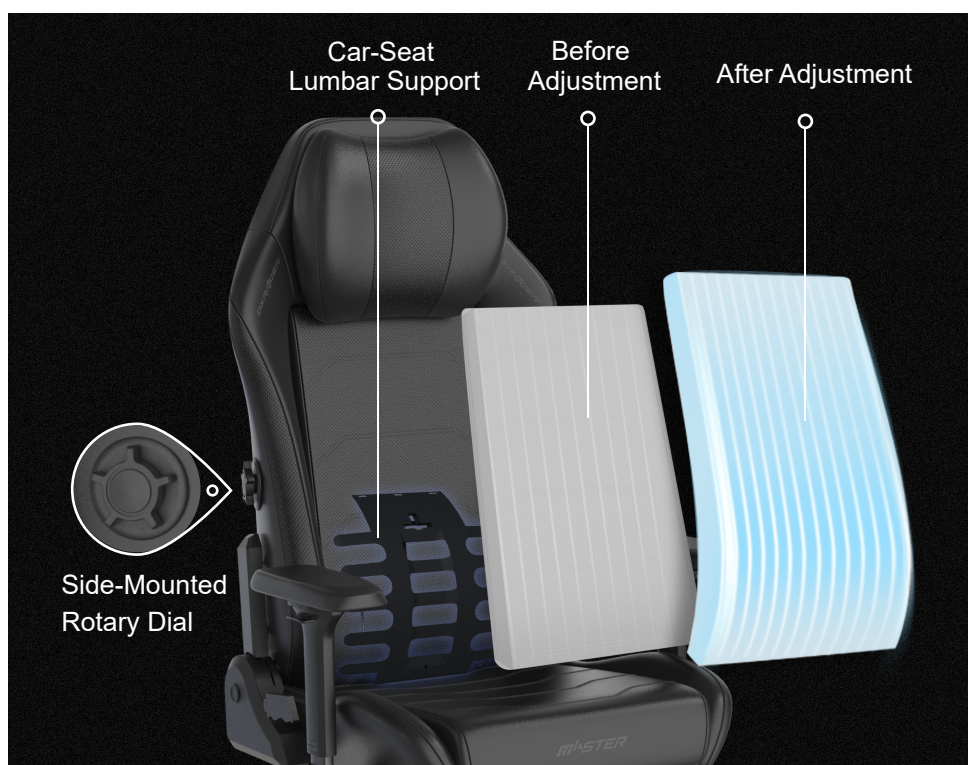

[New Features 1]

Adjustable Rail-mounted Headrest Fits the Necks Perfectly

- Height adjustable headrest
- Best support for all body types
- Ergonomic cervical support & stress alleviation
- Reversible installation

Customizable Modular Parts
